

API response for public key

The screenshot shows the mabl application interface. At the top, a purple banner displays the mabl logo and a message: "Heads up, your trial expires in 9 days. Contact us to start your subscription or extend your trial." with a "Start your subscription" button. Below the banner, the main header area shows the test title "Validating API response for public API" and a status "Passed" with a green checkmark. A sidebar on the left contains navigation icons for New test, Results, Plans, Tests, Insights, Coverage, Accessibility, Configuration, and Settings. The main content area displays test details: Duration (00:00:46), Time of run (Jul 31, 2025 4:09 PM), Environment (Not selected), Plan (Ad hoc cloud run), Variables (View), and a "View all" link. A success message "1. GET jsonplaceholder public API and validating response" is shown with a "Passed" status and a "4 sec" duration. The right panel shows the request details for "GET https://jsonplaceholder.typicode.com/users". It includes tabs for REQUEST, RESPONSE, and ASSERTIONS. The RESPONSE tab is active, showing a table of headers:

| Key | Value |
|-----------------|--------------------------------------|
| Accept | */* |
| Accept-Encoding | gzip, deflate, br |
| Cache-Control | no-cache |
| Connection | keep-alive |
| Host | jsonplaceholder.typicode.com |
| Postman-Token | b90cc751-cd51-4f57-a88e-d50a01e5819d |
| User-Agent | PostmanRuntime/7.33.0 |

This screenshot shows the same mabl application interface as the first, but with the "Body" tab selected in the RESPONSE section. It displays the JSON response body for the GET request to https://jsonplaceholder.typicode.com/users. The response is a JSON array containing one user object. The "Response Content-Type" is "application/json; charset=utf-8".
